

WP List Builder

Version 1.00

Installation Guide

By Robert Plank, PHP Programmer

www.WPListBuilder.com

"Build your e-mail list every time someone logs into your membership site!"

Getting "WP List Builder" up and running is very simple. Now you'll be able to opt-in your users who login to your membership site.

This means that if you have a free membership site, you're building a list. If you have a one-time membership site, you're building a list. If you have a recurring membership site, you're building a list.

Step 1: Upload and activate WPListBuilder. In your dashboard, go to Plugins -> Add New, click the Upload tab. Then upload this zip file.

Step 2: WordPress will ask if you want to activate the WPListBuilder plugin. Click on Activate.

Step 3: Add your opt-in code by going to Settings -> WPListBuilder in the sidebar. Paste your autoresponder opt-in code, and select from the dropdown menu which fields represent the first name and e-mail fields of your opt-in code.

Step 4: Now test the WPListBuilder. Clear your cookies and login to your membership site. It should automatically add you to the mailing list.

Enjoy!
